

# NIST Compliance Support

Let our specialized team of experts work with you to understand your business, policies and controls.

## Compliance Support:

- Up to 350 users
- Assessment of current security controls
- Design required changes within current IT systems
- Deploy changes within current IT systems and enforce new policies
- Continuous management of system control policies
- Interior and exterior vulnerability scanning
- Audit logging on centralized server
- Asset tracking & additional compliance checks on local machines

## Documentation Includes:

- Initial System Security Plan (SSP)
- Initial Plan of Action w/ Milestones (POAM)
- Ongoing management of SSP and POAM

*\*\*Mitigation of issues identified requiring additional hardware and/or software not included (ex. Lack of firewall, lack of proper domain environment, etc.)*

We evaluate your infrastructure, compare it with current compliance requirements and then provide you with a detailed compliance assessment report. Lastly, we continuously manage the system control policies to keep you compliant while ensuring milestones are met.
